SUMMARY

In 1981, serious crime increased 7.2 percent in number of offenses and by 6.0 percent in terms of rate per 100,000 population. Index crime (the nationally standardized measure of serious crime) consists of murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft and arson. Index crime constituted 51.9 percent of all reported offenses in 1981. Part II crime (less serious offenses) decreased in total numbers reported and decreased by 2.1 percent in terms of rate per 100,000 population.

Both total arrests and clearances increased in 1981. Of all Index offenses, 20.0 percent were cleared. Arrests increased by 3.4 percent. This was due to a substantial increase in arrests of adults for Index crimes (10.5%) and an increase for Part II crimes (7.2%). Arrests for juveniles decreased in both categories: -6.2 percent for Index crimes and -9.9 percent for Part II crimes.

Highlights of the report are as follows:

Murder: Over the past six years the crime rate for murder has fluctuated year by year, i.e., up one year and down the next. It was down in 1979, up in 1980, and back down to its 1979 level in 1981. This fluctuation is due in part to the relatively small number of murders committed and, therefore, the ease with which the rate can be affected.

Rape: The rate and number of offenses reported for rape, which decreased in 1980 after going up steadily since 1975, climbed slightly again in 1981.

Robbery: In 1981 there was another substantial increase in robbery--20.1 percent in offenses reported and 18.7 percent in rate per 100,000 population. This is the second large increase in a row--in 1980 the robbery rate rose 15.4 percent.

Aggravated Assault: After steadily increasing since 1975, in 1980 a substantial decrease was reported in aggravated assault. This decrease was difficult to interpret since part of it resulted from a change in classification of some minor assaults to the "Other Assault" category. Nevertheless, this decreasing trend continued in 1981 with a 12.1 percent decrease in reported offenses and a 13.0 percent decrease in rate per 100,000 population.

Burglary: Residential burglary, which had been declining or leveling off since 1975, showed increases in both 1980 and 1981. In 1981 there was a 14.9 percent increase in offenses reported and a 13.6 percent increase in rate per 100,000 population. Nonresidential burglary, which has been increasing since 1978, went up again in 1981. It increased 5.8 percent in offenses reported and 4.7 percent in rate per 100,000 population. The rates for both categories of burglary were above the 1975 level.

Larceny: Larceny began a decline in both rate and offenses reported in 1975, but started rising again in 1978. In 1981 it increased again and is now above the 1975 level.

Motor Vehicle Theft: Except for the years 1977 and 1978, the rate and offenses reported for this crime have been decreasing since 1975 and continued to decrease in 1981.

Arson: In 1981, the rate for arson decreased 3.1 percent from 1980 but still remains higher than the rates for the other previous five years reported.

Part II Crimes: Crimes which showed notable increases were prostitution, stolen property, other assaults, and forgery/counterfeiting. Crimes with substantial decreases were curfew, disorderly conduct, and vandalism.

OREGON AT-A-GLANCE*

Oregon, central state of the Pacific group, is bounded on the north by Washington, on the east by Idaho, on the south by California and Nevada and on the west by the Pacific Ocean, and lies between 42 degrees and 46 degrees 15 minutes, north latitude; and 116 degrees 45 minutes and 124 degrees 30 minutes, west longtitude.

Oregon originally included Washington, Idaho, and parts of Montana and Wyoming, with an area of 286,541 square miles. The width east and west is 395 miles, and the length north and south is 295 miles. Oregon was admitted to the Union on February 14, 1859, and the 33rd star in the flag was added for the state on July 4, 1859.

OVERVIEW OF OREGON CRIME REPORTING AND CRIMINAL JUSTICE SYSTEM

INTRODUCTION

This is the eighth annual report of criminal offenses and arrests produced by the State of Oregon since the beginning of the Oregon Uniform Crime Reporting Program (OUCR). OUCR is an incident based reporting program, tailored to the needs and operational procedures of the police agencies in Oregon. (Reference to "police" includes both police and sheriff departments.)

Incident based reporting requires the recording of specific information about each criminal event known to the police. A criminal event may be reported to a police department by a victim or other source or discovered as a result of police operations. Any reported criminal incident that is determined to be unfounded through subsequent police investigation is deleted from the counts.

The Oregon Uniform Crime Reporting Program requires the reporting of all criminal offenses defined as "Part I and Part II crimes", and the reporting of all arrests for such offenses. Law enforcement agencies also report the clearance of such offenses by arrests of persons or other means. The number of persons reported as arrested includes all persons reported as physically arrested, summoned or cited by police agencies during 1980.

Reporting agencies submit the recorded data monthly to the Law Enforcement Data System either on provided forms or magnetic tape. The data is then processed in a computerized system and reports reflecting the monthly activity of each agency are produced and returned to the contributor for their use.

As agency reports are processed each month, data required for the FBI National UCR Program is extracted. When all agencies have been processed, a magnetic tape containing UCR data for all Oregon incident reporting agencies is mailed to the FBI.

In Oregon, the offense of Arson was reported as a Part II offense since January 1, 1975. By national decree (FBI standards), Arson became a Part I/Index crime on January 1, 1979.

Definitions of the offenses, clearances, and arrests are included in Appendix A of this report.

REPORTING JURISDICTION

Reported offenses relate to the jurisdiction in which they occur. The arrest and clearance, in every case, is attributed to the jurisdiction in which the offense occurred, even though the arresting agency may not be the department originally reporting the offense. State Police and county sheriffs have concurrent jurisdiction in all counties of the state. Their reports generally apply to criminal offenses and arrests occurring in those areas outside incorporated cities which have municipal police departments.

DEGREE OF REPORTING

During 1981, offense and related supplementary information, including arrest data, was received from 140 municipal and other police departments, 36 county sheriff departments and the Oregon State Police, who have provided offense and arrest information in all 36 counties. In 1981, the number of agencies participating in the OUCR program represented service to 99 percent of the state's population.

USE OF OUCR

Only crimes known to the police will be included as part of the official crime rate. Thus, under-reporting of crime can have a significant impact on crime rates and also on the evaluation of the effectiveness of crime reduction programs.

Substantial evidence is contained in reports on criminal victimization surveys which indicates that reporting rates are highly stable among most social groups and across different geographical areas. This suggests reported crime can be a good indicator of crime patterns and trends.

While it is apparent that crime information reported to the police does not provide a complete picture of the crime situation in our society, it is compiled and analyzed because of the following reasons:

a. Reported crime information is used by the police agencies for resource allocation and determining appropriate agency responses to occurrences.

b. Reported crime data, recognized as a portion of the total crime, is, in fact, a highly accurate measurement of occurrences in society that must be addressed by the criminal justice system.

c. This system is based on definitions which are standardized (uniform) across the nation and it is unlikely that it will be appreciably altered in the foreseeable future.

INTERJURISDICTIONAL COMPARISONS

Care should be taken in drawing conclusions and making decisions about problems based solely on crime and arrest data as reported by different law enforcement jurisdictions. Factors relating to crime reporting practices, law enforcement policies, population characteristics and attitudes all contribute to variation in reported data.

Some general factors which may affect the amount of crime reported and type of crime committed are:

- Density and size of the community population and the metropolitan area of which it is a part.

- Composition of the population with reference, particularly to age.
- Economic status, education, and recreation characteristics of the community population.
- Relative stability of the population, including commuters, seasonal, and other transient types.
- Climate, including seasonal weather conditions, and other geographical variations.
- Religious characteristics of the population.
- Effective strength of the police force.
- Policies of the prosecuting officials and the courts.
- Attitude of the public toward law enforcement problems.
- The administrative and investigative follow-up of the local law enforcement agency, including the degree of adherence to crime reporting standards.

SECTION 1

STATEWIDE OFFENSE AND ARREST DATA

INTRODUCTION

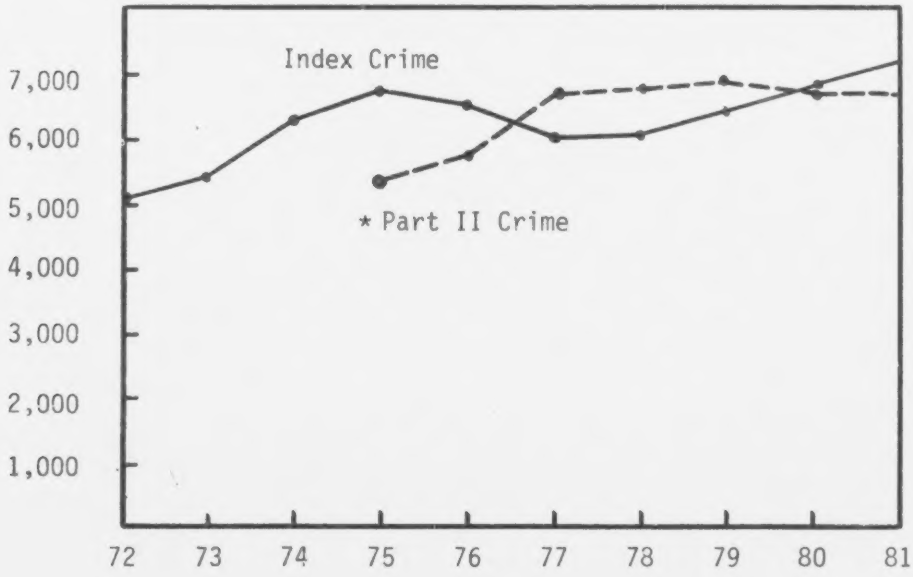
This section presents the number of criminal offenses and arrests reported by police agencies in 1981. The statistics represent the aggregate of all reporting agencies within the state, except when noted, and are arranged in the following three subsections:

1. Overview of offenses.
2. Overview of arrests.
3. Detailed information regarding Index and Part II offenses.

The statewide arrest totals in this section are not identical to those shown in Section 4 of this report. The differences are less than 1/2 of one percent and are the result of two different and separate methods of compiling the data at two different points of time. This difference is not significant enough to affect the overall results.

OVERVIEW OF OFFENSES

- The total crime rate in 1981 was 13,633.7 offenses reported per 100,000 population. This reflects an increase of 2.0 percent over 1980.
- The Index crime rate (7,067.0) increased 6.0 percent.
- The Part II crime rate (6,543.9) decreased 2.1 percent.



*Part II crimes not reported prior to 1975

FIGURE 1 - INDEX AND PART II CRIME RATES - 1972-1981

The 1981 percentage distribution of both Index offenses and Part II (from Table 1) is depicted in the form of a pie chart in Figure 2.

- Larceny represents the largest portion of reported crime in Oregon (31.0%).
- Larceny and burglary together account for 45.4 percent of all reported crime.
- Major violent crimes (murder, rape, robbery) account for 1.7 percent.

- Arrests of Juveniles and Adults for Part I (Index) and Part II crimes are shown in Table 9 for the years 1977 through 1981.

- Of those arrested for Total Part I Index and Part II crimes, the proportion who are juveniles (17 years and under) has been declining each year from 33.6 percent in 1977 to 25.5 percent in 1981. In terms of absolute numbers, there has been a decline in juveniles arrested--38,247 in 1977 to 32,052, or 16.2 percent fewer.

- The number of adults arrested for Part I and Part II crimes has increased by 23.6 percent in five years--from 75,663 in 1977 to 93,524 in 1981 (an additional 17,861 arrests).

- Within the category of Part I Index crimes, total arrests have increased 28.9 percent, but the proportion of the total who are juveniles has been declining from approximately 52 percent in 1977 to 38 percent in 1981. The absolute number of adults arrested has increased 65 percent (14,913 to 24,679), while the number of juveniles arrested has decreased 5 percent (15,970 to 15,118).

- Over the last five years, the number of adults arrested for Part I Violent Crimes has increased from 3,355 to 5,836--an increase of 74 percent. Juvenile arrests for Violent Crimes decreased from 934 to 883, a decrease of 5 percent.

- The number of adults arrested for Part I Property Crimes increased from 11,558 to 18,843, an increase of 63 percent. Juvenile arrests decreased 5 percent (from 15,036 to 14,235).

Summary - Juvenile/Adult Arrests (Table 10)

A summary of the arrest rates (arrests per 1,000 population) for both juveniles and adults is presented in Table 10 by general offense categories for 1981.

As was observed in 1980, adults committed violent offenses at a rate of over two times that of juveniles. Conversely, the property crime rate for juveniles was approximately twice as high as for adults. Another striking difference is the rate for DUII--0.8 for juveniles and 15.2 for adults.

TABLE 10 - ARREST RATES BY OFFENSE CATEGORY

Crimes Involving Theft (Burglary, Larceny, Motor Vehicle Theft, Receiving and Buying Stolen Property, Forgery, Fraud, Embezzlement	19.9	11.17
Crimes Involving Destruction of Property (Arson, Vandalism)	3.0	1.5

Other Offenses (Weapons, Gambling, Family Offenses, All Other)	2.4	4.9

Figure 4 compares the percentages of arrests for Index crime--further broken down into violent and property crime categories--by age groupings with their respective percentages of population.

- As shown, the age groups from 13 to 20 comprised a disproportionately high 48.4 percent of total arrests, yet accounted for only 13.4 percent of the total population.

- 60.4 percent of the individuals arrested for violent crimes were between the ages of 21-39. This age group represents only 32.0 percent of the population. Persons in their twenties accounted for the most disproportionate share of violent crime arrests.

- The ratio of arrests to population for property crime peaked at 16 to 17 years of age (17.4 percent of arrests and 3.4 percent of the population). Of the total arrests for property crime, 53.0 percent were of individuals between the ages of 13 to 20--again representing only 13.4 percent of the population.

*Based on 1980 Census Data

MURDER

- 115 offenses of murder were reported in 1981--down 11.5 percent from 1980.
- Murder accounted for 0.03 percent of all crimes reported and 0.06 percent of Index crime reported in 1981.
- The murder rate (4.3 per 100,000 population) was down from 4.9 in 1980.

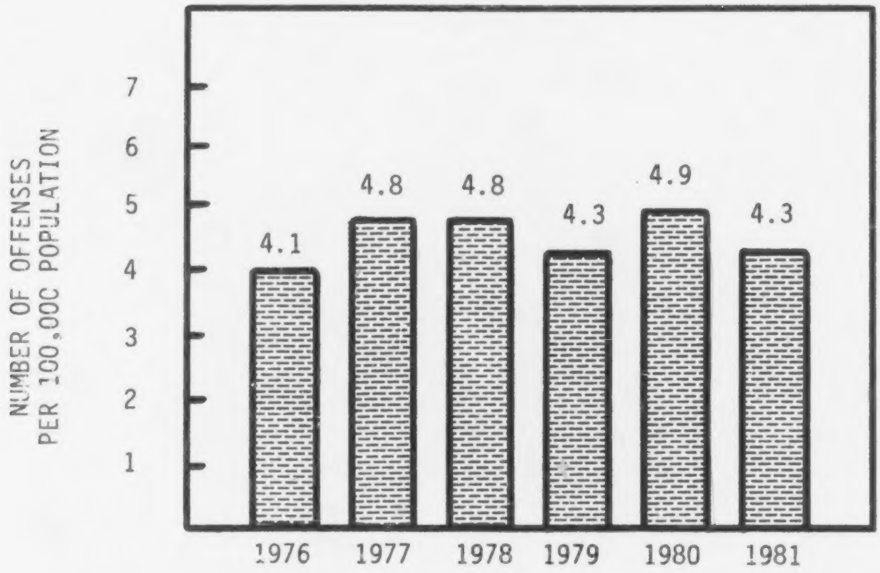

FIGURE 5 - MURDER RATES

Murder--Weapon (Figure 6)

The percentage of murders by type of weapon used is shown in Figure 6.

- Of the 115 murders committed in 1981, all were reported by type of weapon.
- Of these 115 murders, 51.3 percent involved a firearm.
- The percentage of murders involving a handgun increased from 30.8 percent in 1979 to 33.9 percent in 1981.

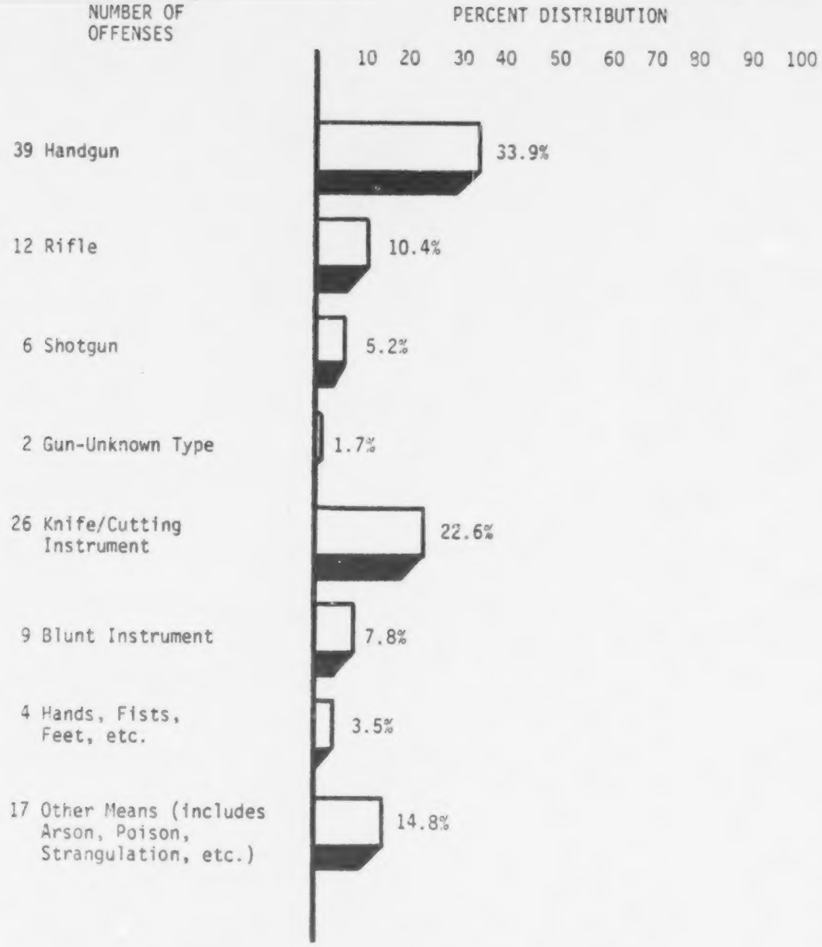

FIGURE 6 - MURDER - TYPE OF WEAPON

Murder--Victims (Table 11)

The number of murder victims by various age, sex, and race groupings are presented in Table 11.

- 13.0 percent of victims were under 18; 18.3 percent were 18-24; and, 68.7 percent were age 25 and older.
- Male victims accounted for 67.0 percent; females accounted for 33.0 percent.
- 82.6 percent were White; 7.0 percent were Negro; 5.2 percent were Hispanic; and, 5.2 percent were other races.

DRIVING UNDER THE INFLUENCE OF INTOXICANTS (DUII)

Due to the nature of the offense and the fact that an arrest is made at the time an offense is known, data regarding DUII is presented in the following arrest section.

- 29,828 arrests were made for DUII in 1981.
- The arrest rate was 1121.4 per 100,000 population, down 5.9 percent from 1980.
- DUII accounted for about 8.4 percent of all crimes in Oregon and 17.4 percent of Part II crime.

Of the 29,828 arrests, all were reported by age and sex.

- 1.9 percent were of juveniles and 98.1 percent were adults.
- 84.9 percent were male and 15.1 percent were female.
- The median age of persons arrested was 32 years.

The 29,828 arrests were reported by specific type and circumstances at the time of arrest, as shown in Table 26. As indicated, the largest percentage of persons arrested were arrested for blood alcohol levels of .10 percent to .20 percent. As a percentage of all tests given, 6.8 percent registered blood alcohol levels of under .10; 14.7 percent had levels of .10 to .15; 26.9 percent had levels .15 to .20 and 19.1 percent were .20 and above. The percentage distribution did not change notably from 1980.

SECTION 2

OFFENSES, CLEARANCES AND ARRESTS BY DISTRICT, COUNTY, AND AGENCY

The agency statistics concerning Part I and II offenses contained in the following tables were reported to the Oregon UCR program by the individual participating agencies for 1981 and include totals for each administrative district and county including a total for the Oregon State Police in each county.

The following key is included as an explanation of the abbreviations used throughout the tables:

KEY TO FORMAT ABBREVIATIONS

Months of Reporting	The number of months reported by each individual agency.
Officer Assaults	The number of reported assaults on police officers during the reporting period.
OFF	The number of actual verified offenses or attempts as set forth by UCR guidelines and definitions.
ARR	The number of arrests made during the reporting period. (Includes any arrests made during this period for offenses reported prior to 1/1/81. Includes persons cited, summoned, and notified as well as those taken into physical custody.)
CLR	The number of offenses cleared by arrest or cleared exceptionally during the reporting period. (Includes any clearances made during this time for offenses reported prior to 1/1/81.) These are counts of offenses cleared, not persons arrested.

NOTE: When counting arrests, only those arrests which are made for an agency's "own" cases are counted for UCR purposes. For example, if Agency A makes an arrest on a warrant for Agency B, Agency B counts the arrest for UCR purposes. Agency A does not count it. For this reason, the number of arrests shown in this report will not necessarily agree with the statistics within a department which may show all arrest activity.

STATISTICAL METHODS

CALCULATION OF CRIME RATES

Quite often it is desired to compare the volume of crime occurrence, either totally or by individual offense, over a period of time for a selected group of agencies or jurisdictions. The geographical area being studied will undoubtedly consist of law enforcement agencies of various strengths and serving widely varying sizes of population. An agency equalizing factor must be developed, or in other terms, a common denominator is needed. To arrive at a valid comparison, the concept of rate is utilized.

The crime rate is defined as the number of offenses occurring per 100,000 population over the period of one year. The common denominator for any community, county, district, or state is obtained by dividing the population represented by 100,000. Once this denominator is determined, it becomes a relative constant until such time as the population of the community, county, district, or state changes appreciably. The crime rate can be calculated then by dividing the number of offenses by the denominator.

a. Population ÷ 100,000 = common denominator

b. Number of offenses ÷ common denominator = crime rate

Example:

Agency A serves a population of 50,000 and experienced a total of 2,500 Index offenses in 1981.

Index Crime Rate -

a. $\frac{50{,}000 \text{ (population)}}{100{,}000} = 0.50$ (common denominator)

b. $\frac{2{,}500 \text{ (number of offenses)}}{0.50 \text{ (common denominator)}} = 5{,}000$ (crime rate)

Therefore, the Index crime rate for Agency A in 1981 was 5,000 offenses per 100,000 population.

Example:

Agency B serves a population of 128,750 and experienced a total of 13,500 robbery offenses in 1981.

Robbery Rate -

a. $\frac{128{,}750}{100{,}000} = 1.2875$

b. $\frac{13{,}500}{1.2875} = 10{,}485$

The robbery rate for Agency B in 1981 was 10,485 offenses per 100,000 population.
